**Description**  
**Is your feature request related to a problem? Please describe.**  
Currently, a separate view for uploading is displayed and thus "hides" the actual conference (participants, chat, videos, slides) during the entire upload and conversion. This time could otherwise be used to answer questions from the chat or to continue the current presentation.  
  
**Describe the solution you'd like**  
It would be good to move the selection of PDFs to a separate area within the conference view, just as it is done when creating a poll (see mockup below). The file should then simply be uploaded in the background, even if the sidebar is minimized.  
  
**Describe alternatives you've considered**  
Several presentations can be uploaded at the beginning as long as it is already known what exactly is to be shown and there is enough time.
